# The simplest way

...to be a SunSmart whiz!

Can you answer this SunSmart quiz?

**Q1. At what UV level do you need to apply sunscreen?**

**Q2. How do I find out the daily UV level?**

**Q3. Do I need sun protection on cool or cold days?**

---

**A1:** Always use sun protection when the UV levels are three and above. You may also need sun protection if the UV is below three and you are around highly reflective surfaces or outside for extended periods of time.

**A2:** The easiest way to find out the daily UV level is to download the SunSmart App and set up a daily alert on your device. Alternatively, you can check the newspaper or the Bureau of Meteorology website.

**A3:** UV levels are not related to temperature and in most parts of NSW, remain for most of the year. You can't see or feel UV radiation so it is best to check the daily UV level and not rely on temperature.

To help keep your kids safe in the sun, check your schools SunSmart status by heading to [www.sunsmartnsw.com.au](http://www.sunsmartnsw.com.au)
